

Quick Cover LT is your BEST alternative!

Material Description

Quick Cover LT is a cellulose fiber based spray slurry ADC manufactured without adding water in the process. In fact, the manufacturing process reduces moisture content to an incredibly low 7-% by weight. That means that 200 lbs. more fiber for every ton or 10-% more product for the money compared to most other national brands.

The product is manufactured from recycled fiber stock and specially formulated binding agents. Quick Cover LT Plus also contains a fire retardant. A superb quality control process during manufacturing virtually eliminates debris clogging materials. The low moisture content naturally inhibits mold growth, which can cause hard chunks that clog pumps, hoses, and nozzles.

Application Procedures

1. Fill ADC application equipment with water.
2. Add one 33-lb. bag of Quick Cover LT or Quick Cover LT+ to 80 gallons of water.
3. Allow materials to mix until they form a homogeneous slurry.
4. Apply by spraying directly on the compacted refuse.
5. Use appropriate spray nozzles and apply from multiple directions for best coverage.

Feature & Advantages

- Can be used in jet agitated and mechanical agitated ADC application machines.
- *No water added*—Quick Cover LT contains 98% active ingredients.
- Quick Cover LT is packaged in 33-lb. easy to lift bags.
- Vivid green color assists with an efficient and even application.
- Mixes quickly and easily.
- 100% hand sorted recycled newsprint.
- More mulch per pound due to low moisture content—33 lbs. of

Seven manufacturing plants in the U.S. allows Space Savers to boast the lowest average freight cost in the industry!

Quick Cover LT dries to form a uniform coating on top of the waste. Drying time is typically 30 minutes to one hour depending on weather conditions. During windy conditions, the slurry may need to be sprayed from multiple directions to ensure proper coverage.

Regulatory Compliance

When properly applied, Quick Cover LT forms a uniform coating that conforms to the shape of the underlying waste and provides the following functions in general compliance with ASTM D68

- ✓ Controls Fires
- ✓ Controls Odors
- ✓ Is Non Toxic
- ✓ Controls Disease Vectors
- ✓ Controls Blowing Litter
- ✓ Controls Scavenging
