

Space Savers is your best Alternative for Odor Control

QUICK SORB

Specially Formulated Neutralizer

PRODUCT INFORMATION

Material Description

Odors control is a big concern for some landfills. To help our customers manage their odor concerns Space Savers, in conjunction with NCM Odor and Dust Control, has developed Quick Sorb, odor neutralizer. Quick Sorb is designed and formulated for surface application with cellulose spray products such as Quick Cover. The components of Quick Sorb are proven effective in various other odor elimination applications. It is composed of an odor neutralizing agent, propylene glycol, emulsifiers, essential oils, botanicals and surfactants. All emulsifiers and foaming agents are biodegradable. The components of Quick Sorb are proven effective in various other odor elimination applications

Directions for Use

This product is intended for use with spray ADC, hydroseeding or other similar spray slurry equipment.

1. Fill ADC application approximately 75-percent full with water;
2. Add ADC mix (use one 50-pound bag of Quick Cover to every 100-gallons water, or one 33-pound bag of Quick Cover_{LT} to 80 gallons of water);
3. Add remainder of water to complete mixture;
4. Add Quick Sorb odor neutralizer (add one-gallon of Quick Sorb to every 500-gallons of Quick Cover mixture). Note: mixture ratio varies depending on personal preference, waste types and climatic conditions.
5. Initiate paddle wheel agitation and/or pump recirculation. Allow materials to mix until they for a homogeneous slurry, 15 minutes is typically sufficient.
6. Apply mixture by spraying directly on the compacted refuse. Use proper application nozzle to provide consistent coverage. Apply for more than one location to prevent shadowing

Packaging

- Quick Sorb is packaged in:
 - 1-gallon jugs;
 - 5-gallon pails;
 - 55-gallon drums and
 - 270-gallon totes.
