Summer 2017 Newsletter

Our new additions makes Space Savers virtually unbeatable in terms of price, quality and ADC product variety!

At Space Savers, we've been working hard to develop new products and lower costs and help save airspace. Below is some information on our recent accomplishments. For more information visit our website, www.SpaceSaversADC.com or call us at 817.480.1955.

Expanded Manufacturing

Space Savers is pleased to announce the expansion of its manufacturing capabilities beyond our current manufacturers in Texas and Idaho. A new strategic alliance now allows us to manufacture alternate daily cover in ten US states and Canada. The new capabilities will lower freight charges and improve delivery time. While we will continue to provide the same Quick Cover as before, our new mills will make a slightly different product, called Quick Cover_{LT}. Quick Cover_{LT} comes in 33-pound bags instead of the more familiar 50-pound bags. However, no moisture is added during the manufacturing process. Due to the absence of moisture, a 33-pound bag of Quick Cover_{LT} is equivalent to 40-pounds of Quick Cover.

Space Savers ADC manufacturing capabilities now include ten US states and Ontario Canada. Red circles denote Quick Cover (50-lb. bag) and white circles denote Quick Cover_{LT} (33-lb. bag) manufacturing locations. Circle radii are 200 miles.

In addition to new manufacturing locations, our Texas manufacturing facility is installing a new bagging system. The new bagger will produce a more compact bag than the current bags. The new bags will be more stable and will allow for more bags to be placed on a truck load, which equals savings that is passed on to our customers.

Quick Sorb - Odor Neutralizer

Odor control is an important issue for some landfills. To help our customers manage their odor concerns, Space Savers in conjunction with NCM Odor and Dust Control, has developed Quick Sorb odor neutralizer. Quick Sorb is specially formulated for surface application with cellulose spray products such as Quick Cover. It is composed of an odor neutralizing agent, propylene glycol, emulsifiers, essential oils, botanicals and surfactants. All emulsifiers and foaming agents are biodegradable. The components of Quick Sorb are proven effective in various other odor elimination applications. Quick Sorb is packaged in one-gallon jugs, 5-gallon pails, 55-gallon drums and 270-gallon totes.

Quick Tarp - Alternate Daily Cover Tarps

Space Savers entered the ADC tarp market earlier this year with the Quick Tarp brand. Quick Tarps are made from a 9.43 ounce, 20.5 mil thick polypropylene geotextile. The tarps come in various sizes including: 50' x 50', 50' x 100', 75' x 100' and 100' x 100'. Quick Tarps are unique because of the materials used in their manufacturing. The thread used for the polypropylene fabric is much thicker than threads used in other tarps. The thick threads make the fabric more resistant to tearing or punctures. Also, the webbing used to reinforce Quick Tarps is wider and thicker than webbing used for other tarps. The combination of stronger fabric and stronger webbing makes these tarps the strongest on the market. We also sell an economical 6.5 oz. polyethylene tarp. Quick Tarps are warehoused and can typically be shipped next day.
